

# QuikDeploy™ Desktop Deployment Service

## The Challenge

Ready to migrate to a new version of Windows, but need help with planning and implementing the migration? Do you need help with learning best practices for conducting the migration?

QTS is a leading network integrator serving NJ/NY businesses for over 10 years, with strategic relationships with Microsoft, Cisco, Symantec, Citrix, HP and other partners. QTS specializes in Security, Network Management and High Availability solutions to maximize network up-time. QTS implements solutions that help customers grow their business, reduce costs or create competitive advantage.

**GOLD CERTIFIED**

Partner

## The Solution

QTS' QuikDeploy™ Desktop Deployment service offering provides you with a methodology and process to help you with a smooth migration to the latest versions of Windows and Office, and with the supplemental resources and expertise needed to help your staff accomplish the migration efficiently.

Our process follows the Microsoft Solutions Framework and Microsoft best practices for the migration, and leverages new Microsoft tools (the **Business Desktop Deployment Solution Accelerator**) to maximize the efficiency of the upgrade process. The methodology takes the project through five phases:

- Envision (Define Project Vision and Scope, Develop Plan)
- Plan (Initial Image Testing, Setup BDD Tools, Detailed Planning)
- Develop (Test Applications and Images, Finalize Approach)
- Stabilize (Pilot Testing)
- Deploy (Production Rollout)

In this service offering, we take you through this process with assistance, knowledge transfer and supplemental resources to keep your project on schedule and insulate against risk. We help with planning for image management, software distribution and deployment, user state and data migration and application compatibility testing. We help develop a plan specific to your environment, and then help you execute against that plan.
