

QuikDesign™ Active Directory Design Services

The Challenge

Ready to move to Windows 2000 or 2003 Server and Active Directory, but not sure what is involved? What are best practices? How do I integrate all the elements of my current network, and identify other components that should or must be upgraded? How do I perform the upgrade non-disruptively and with minimal risk?

QTS is a leading network integrator serving NJ/NY businesses for over 10 years, with strategic relationships with Microsoft, Cisco, Symantec, Check Point, Novell, Citrix, HP and other partners. QTS specializes in Security, Network Management and High Availability solutions to maximize network up-time. QTS implements solutions that help customers grow their business, reduce costs or create competitive advantage.

The Solution

QTS' QuikDesign™ Active Directory service offering provides you with an optimized Active Directory design and a customized upgrade plan to Windows 2000 or 2003 Server.

In this service offering, our engineers will work with you to train your IT staff on new Windows 2000/2003 and Active Directory concepts. Concurrently, we will learn your network and identify its current layout and architecture. We will perform an onsite network review of your Windows servers and related systems. This allows us to identify upgrade issues, and opportunities for improvement, proactively.

This approach combines our expertise, from working in a wide variety of client environments and constantly performing upgrades, with the expertise of your staff, who know your network, your users and your business.

The end deliverable of the engagement is a report that summarizes our findings – both by presenting a high level Active Directory Design (recommendations on Sites, Organizational Units, Forest/Tree/Domain structure and other areas), and by identifying an upgrade plan and potential issues. The report provides a basis for us to work with you in implementing the upgrade, or if you have the internal resources and staff expertise, for you to do so on your own or with our assistance and backup.
