

QuikDesign™ for Desktop Deployment Service

The Challenge

Ready to migrate to a new version of Windows, but concerned about the pain and cost of transition? Are you concerned about the effort of a manual "sneakernet" upgrade? Worried about managing a myriad of system images? How would you move user data, profiles and custom settings from old to new environments? How would you deal with application compatibility problems and concerns, or know how to test for this?

QTS is a leading network integrator serving NJ/NY businesses for over 10 years, with strategic relationships with Microsoft, Cisco, Symantec, Citrix, HP and other partners. QTS specializes in Security, Network Management and High Availability solutions to maximize network up-time. QTS implements solutions that help customers grow their business, reduce costs or create competitive advantage.

The Solution

QTS' QuikDesign™ for Desktop Deployment service offering provides you with a high-level plan for upgrading your environment to Windows XP or Vista, and Office 2003/2007, leveraging Microsoft best practices and new Microsoft tools (the **Business Desktop Deployment Solution Accelerator**) to identify the potential issues and stumbling blocks, and plan around them.

In this service offering, our consultants will conduct a two day workshop with your IT team to understand your environment and provide knowledge transfer on Microsoft best practices for deployment, using the BDD Solution Accelerator tools. We identify issues and potential solutions while exploring deployment methodologies, application compatibility, image management and user state migration (profiles, settings, data) to the new platform. Your staff will learn new methodologies and tools, and we will learn your environment so we can make focused recommendations.

The end deliverable of the engagement is a report that summarizes our findings – both by presenting the high level issues and considerations and by identifying an implementation plan. From there, you may choose to leverage our QuikDeploy Desktop Deployment service to have us assist you with our methodology for a successful and efficient Windows migration.
