

QuikDesign™ SharePoint Design Service

The Challenge

Ready to implement SharePoint Portal Server, but not sure where to start? Do you have multiple Windows SharePoint Services team sites you need to integrate? Trying to build a collaboration strategy to improve staff productivity?

QTS is a leading network integrator serving NJ/NY businesses for over 10 years, with strategic relationships with Microsoft, Cisco, Symantec, Citrix, HP and other partners. QTS specializes in Security, Network Management and High Availability solutions to maximize network up-time. QTS implements solutions that help customers grow their business, reduce costs or create competitive advantage.

GOLD CERTIFIED
Partner

The Solution

QTS' QuikDesign™ SharePoint Design service offering provides you with an optimized plan for implementing Microsoft SharePoint technologies (SharePoint Portal Server, Windows SharePoint Services) and related technologies within your environment.

In this service offering, our consultants will work with you to define your "Vision" for the capabilities you wish to deliver to your users, around key applications and workflows, then work with you in planning an optimized design and implementation plan that allows you to achieve these goals in the appropriate sequence of phases.

Our approach is based on the Microsoft Solutions Framework process model and corresponds to MSF stages one (Envisioning) and two (Planning), and includes planning meetings with knowledge transfer. This approach combines our expertise, from working in a wide variety of client environments, with the expertise of your staff, who know your network, your users and your business.

The end deliverable of the engagement is a report that summarizes our findings – both by presenting a high level design and by identifying an implementation plan and potential issues. From there, we can move forward with implementation to help you realize the benefits of your project.

QuikDesign™ SharePoint Design Service: Key Benefits

- Define a clear plan for implementing Microsoft collaborative technologies in the context of your environment.
- Properly scale and plan your project from the outset, without under or over-buying.
- Leverage external expertise for effective knowledge transfer to your IT staff, so they learn new technologies in the context of their own network.
- Consulting approach tailored to and optimized for Medium Enterprise businesses with 100-5000 users.
- Define an implementation plan to prepare a realistic budget for your project.
- Maximize ROI by doing the project right – ***the First Time!***
