

QuikSecure™ Security Evaluation Services

The Challenge

How secure is your network? Are you confident that your network is safe from hackers, crackers and hostile organizations? Are your eCommerce links and partner extranets secure? Can you withstand Denial of Service attacks? Is your network safe from viruses, vandals, Trojans and other forms of malicious code? Do you have a documented security policy?

QTS is a leading network integrator serving NJ/NY businesses for over 10 years, with strategic relationships with Microsoft, Cisco, Symantec, Check Point, Novell, Citrix, HP and other partners. QTS specializes in Security, Network Management and High Availability solutions to maximize network up-time. QTS implements solutions that help customers grow their business, reduce costs or create competitive advantage.

The Solution

QTS QuikSecure™ Security Evaluation Services provide an objective perspective on the security of your network, and give you specific recommendations for each core element of a security strategy. The deliverable is an actionable list of security vulnerabilities, with the ability to tighten security based on the audit results.

Our approach is based on a three stage process, with each stage being a distinct engagement. The process consists of:

- **Security Assessment:** We perform a thorough, broad-based review of your procedures and systems from a security perspective, and identify areas of weakness, presented in a report.
- **Vulnerability Assessment:** We use automated tools to scan your systems (firewalls, servers, access servers) for vulnerabilities, and document those vulnerabilities specifically in a report.
- **Penetration & Attack Testing:** We attempt a controlled break-in against your network, to see how far vulnerabilities can be exploited.

At the conclusion of each stage, we can work with you to tighten security as per our recommendations. The process should be planned to recur annually as a core element of your security strategy.
