

QuikSecure™ Security Policy Development Service

The Challenge

How secure is your network? Do you know whether users are compromising your business secrets, intentionally or otherwise? Are you losing time and resources as employees surf the web? Do you worry about lawsuits from terminated employees? Do you have written policies for how your computer systems should and should not be used?

QTS is a leading network integrator serving NJ/NY businesses for over 10 years, with strategic relationships with Microsoft, Cisco, Symantec, Check Point, Novell, Citrix, HP and other partners. QTS specializes in Security, Network Management and High Availability solutions to maximize network up-time. QTS implements solutions that help customers grow their business, reduce costs or create competitive advantage.

The Solution

QTS QuikSecure™ Security Policy Development Services provides the framework upon which all of your security systems and procedures should be built. A Security Policy is a clearly written business document that defines which actions and behaviors are desired and acceptable, and which are not. Your security systems and business policies should enforce these rules.

QTS can help you develop a Security Policy, through a one day consulting engagement in which we meet with key members of your IT and Management teams to help you define your desired security rules. As part of this process, we:

- Identify key business issues and concerns that need to be addressed in your Security Policy;
- Develop a Security Policy with you, based on a QTS Master Template that incorporates industry best practices;
- Recommend next steps for implementing your Security Policy; and
- Educate you for ongoing management of your Security Policy.

At the end of the one day engagement, you will have a usable Security Policy, and be clear on how to go about implementing it in your business.
